Professional Summary

Oracle Certified Java SE Programmer with 10 years of experience in Java maintenance, L1/L2 Technical Production Support, Site Reliability Engineering (SRE), and DevOps. Proven expertise in delivering scalable and reliable solutions, automating monitoring systems, and supporting global production environments. Skilled in Core Java, SQL, Unix/Linux, CI/CD pipelines, Kubernetes and cloud technologies. Strong background in improving system uptime, reducing MTTR, enhancing observability, and driving operational efficiency through automation and continuous improvement. Dedicated to ensuring high availability, optimizing infrastructure performance, and enabling seamless business operations.

Core Competencies

Incident & Problem Management | Site Reliability Engineering | Root Cause Analysis | DevOps | CI/CD (Jenkins, Git) | Monitoring (AppDynamics, Datadog, Kibana) | Cloud Platforms (AWS, Azure) | Java & SQL | Unix & Shell Scripting | OpenShift Container Platform |Kubernetes | Autosys | Performance Optimization | Team Leadership | Change & Release Management | ITIL Processes

Technical Skills

- **Languages:** Core Java, SQL, Unix/Shell Scripting
- **Cloud Platforms:** AWS (Certified), Microsoft Azure (Certified)
- **Monitoring Tools:** AppDynamics, Datadog, Kibana, Autosys
- **Automation & CI/CD:** Jenkins, Git, Autosys, ServiceNow
- **Databases:** Oracle 19C
- **Operating Systems:** Windows, UNIX/Linux

Professional Experience

Capgemini – Pune, Maharashtra | Senior Consultant / Production Support Lead | Oct 2019 – Present

Client Name: Capital One (Formerly Discover Financial Service)
Project Name: Discover Digital Xchange (E-Wallet Provisioning and Tokenization)
Project Overview: Worked on the Discover Digital Exchange application supporting integration with major E-Wallet platforms including Apple Pay, Samsung Pay, Android Pay and Stored Payment tokens. The project involved enabling secure card provisioning and tokenization for supported card types to facilitate contactless payments via mobile devices.
Key Responsibilities:

- Led and mentored a global team of 19 production support engineers, driving collaboration, knowledge sharing, and operational excellence across distributed time zones.
- Managed production support for the Discover Digital Exchange (E-Wallet) platform, ensuring 99.99% uptime and seamless integrations with Apple Pay, Samsung Pay, Android Pay, and Card-on-File services.
- Directed end-to-end production support initiatives, including incident management, release readiness, monitoring, and service continuity planning.
- Implemented observability dashboards using AppDynamics, Datadog, and Kibana, improving monitoring visibility and reducing MTTI by 35%.
- Automated job failure handling, health checks, and routine tasks using Shell scripting, cutting manual intervention by 40% and improving response efficiency.
- Served as Incident Commander during high-severity outages, leading impact analysis, stakeholder communication, root cause analysis, and post-incident reviews.
- Collaborated with DevOps and Engineering teams to enhance CI/CD pipelines, improving deployment stability, performance, and release quality.
- Participated in CAB meetings, authored and validated change requests, and ensured production compliance with change management and security standards.

- Developed and maintained SOPs, runbooks, KB articles, and training materials, enabling consistent support delivery and quicker onboarding.
- Recognized with Customer Delight and Certificate of Appreciation awards for driving observability improvements, SRE adoption, and operational excellence.

Capgemini – Pune, Maharashtra | Associate Consultant/Application Support Engineer | May 2016 – Sep 2019

Client Name: Discover Financial Service
Project Name: DN Fraud
Project Overview: Contributed to a comprehensive fraud detection and compliance platform comprising four integrated applications: Fraud Alert, Guardian, Verify+, and Release Compliance Tool (RCT). The system supports real-time and batch processing to detect and manage fraudulent transactions, maintain user alert preferences, and validate compliance with Discover Network standards.
Key Responsibilities:

- Resolved production incidents and coordinated with onshore business teams to ensure timely resolution and minimal impact.
- Delivered 99% SLA adherence for incident response and resolution across critical fraud detection systems.
- Managed and monitored Autosys batch jobs, disk space, MQ listeners, and application health using Jenkins and internal tools.
- Conducted root cause analysis and developed preventive automation scripts to eliminate recurring issues and reduce manual effort.
- Automated daily and monthly client reports, improving accuracy, timeliness, and reducing manual workload.
- Led service improvement initiatives to enhance monitoring, alerting, and deployment validation processes.
- Created and maintained change tickets, validated deployments for production readiness in alignment with CAB protocols and responded to business queries with enhancements aligned to operational goals.
- Mentored new team members, led team activities, and contributed to knowledge sharing and onboarding.
- Reported service levels and performance metrics to ensure transparency and continuous improvement.

Education

- M.Tech – Engineering Management, Manipal Institute of Technology, Manipal University (2015) – 8.49 CGPA
- B.Tech –Information technology, St. Joseph Engineering College, Visvesvaraya Technological University (2013) – 72.45%
- 12th – Science, MGM PU College, Karnataka State Pre-University Board (2009) – 78.33%
- 10th – General Education, Indrali English Medium School, Karnataka Secondary Education Board (2007) –91.20%

Certifications

- AWS Certified Developer – Associate
- AWS Certified Solutions Architect – Associate
- Oracle-certified-associate-java-se-7-programmer
- Microsoft Certified: Azure Fundamentals

Achievements

- Pat on the Back Award (Sep 2018): Recognized for exceptional dedication, ownership, and strong team contributions.
- Rising Star Award (Apr 2019): Awarded for leading automation initiatives that boosted operational efficiency.
- Customer Delight Award (Apr 2021): Honoured for consistently delivering high-quality solutions and client service.
- GEM – Going the Extra Mile (Dec 2024): Acknowledged for exceptional commitment in supporting weekend interview panels.
- Certificate of Appreciation (Mar 2025): Recognized for Datadog expertise and creating dashboards that improved observability.
- WOW – Client Value Creator (Oct 2025): Awarded for achieving AWS Certification and enhancing the Discover account roadmap.
